

Assignment 1

Human class:

```
package Assignments.Week3.Assignment1;

public class Human {
    private String first_name;
    private String last_name;

    public Human() {
    }

    public Human(String first_name, String last_name) {
        this.first_name = first_name;
        this.last_name = last_name;
    }

    public String getFirst_name() {
        return first_name;
    }

    public void setFirst_name(String first_name) {
        this.first_name = first_name;
    }

    public String getLast_name() {
        return last_name;
    }

    public void setLast_name(String last_name) {
        this.last_name = last_name;
    }

    public void printdata(){
        System.out.println("First name: "+first_name+"\n"+"Second name: "+last_name);
    }
}
```

Student class:

```
package Assignments.Week3.Assignment1;

public class Student extends Human {
    private String faculty_number;
    public Student(){
    }
    public Student(String first_name, String last_name, String faculty_number){
        super(first_name,last_name);
        this.faculty_number=faculty_number;
    }

    public String getFaculty_number() {
        return faculty_number;
    }

    public void setFaculty_number(String faculty_number) {
        this.faculty_number = faculty_number;
    }
}
```

```

@Override
public void printdata(){
    super.printdata();
    System.out.println("Faculty number: "+faculty_number);
}
}

```

Worker class:

```

package Assignments.Week3.Assignment1;

public class Worker extends Human {
    private double weekSalary;
    private int workHoursPerDay;
    public Worker(){
    }
    public Worker(String fname, String lname, double wekSalary, int workhours){
        super(fname,lname);
        this.weekSalary=wekSalary;
        this.workHoursPerDay=workhours;
    }

    public double getWeekSalary() {
        return weekSalary;
    }

    public void setWeekSalary(double weekSalary) {
        this.weekSalary = weekSalary;
    }

    public int getWorkHoursPerDay() {
        return workHoursPerDay;
    }

    public void setWorkHoursPerDay(int workHoursPerDay) {
        this.workHoursPerDay = workHoursPerDay;
    }

    public double moneyPerHour(){
        int weekhours=workHoursPerDay*5;
        return weekSalary/weekhours;
    }
    @Override
    public void printdata(){
        super.printdata();
        System.out.println("Work hours per day: "+workHoursPerDay+"\n"+"Money per hour: "+moneyPerHour()+"\n"+"Weekly salary: "+weekSalary);
    }
}

```

Main class:

```

package Assignments.Week3.Assignment1;
import java.util.Scanner;
public class Main {
    public static void main(String[] args) {

```

```

Scanner in=new Scanner(System.in);

Assignment2

Animal:

```
package Assignments.Week3.Assignment2;

public class Animal {
    private String name;
    private int age;
    private String gender;

    public Animal(String name, String gender, int age) {
        this.name = name;
        this.age = age;
        this.gender = gender;
    }

    public String getName() {
        return name;
    }

    public void setName(String name) {
        this.name = name;
    }

    public int getAge() {
        return age;
    }

    public void setAge(int age) {
        this.age = age;
    }

    public String getGender() {
```

```

        return gender;
    }

    public void setGender(String gender) {
        this.gender = gender;
    }
    public void eat(){
        System.out.println("Animal have been fed!");
    }
    public void sleep(){
        System.out.println("Z z z...");
    }
    public void produceSound(){
        System.out.println("sound of animal");
    }
    public void printing(){
        System.out.println("Name: "+getName()+"\nAge: "+getAge()+"\nGender: "+getGender());
    }
}

```

Dog:

```

package Assignments.Week3.Assignment2;

public class Dog extends Animal{
    public Dog(String nam, String ag, int gen) {
        super(nam,ag,gen);
    }
    @Override
    public void eat(){
        System.out.println("Dog "+super.getName()+" ate some meat!");
    }
    public void sleep(){
        System.out.println("Dog "+super.getName()+" is sleeping! Hrrrh Frruuh...");
    }
    public void produceSound(){
        System.out.println("Bark!");
    }
    public void printing(){
        System.out.println("Data about dog:");
        super.printing();
    }
}

```

Cat:

```

package Assignments.Week3.Assignment2;

public class Cat extends Animal{
    public Cat(String nam, String ag, int gen) {
        super(nam,ag,gen);
    }
    @Override
    public void eat(){
        System.out.println("Cat "+super.getName()+" ate some fish!");
    }
}

```

```

    }
    public void sleep(){
        System.out.println("Cat "+super.getName()+" is sleeping! Mrrr ...");
    }
    public void produceSound(){
        System.out.println("Nyaa!");
    }
    public void printing(){
        System.out.println("Data about cat:");
        super.printing();
    }
}

```

Bird:

```

package Assignments.Week3.Assignment2;

public class Bird extends Animal{

    public Bird(String nam, String ag, int gen) {
        super(nam,ag,gen);
    }

    @Override
    public void eat(){
        System.out.println("Bird "+super.getName()+" ate some warms!");
    }
    public void sleep(){
        System.out.println("Bird "+super.getName()+" is sleeping!");
    }
    public void produceSound(){
        System.out.println("Chirp chirp ...");
    }
    public void printing(){
        System.out.println("Data about bird:");
        super.printing();
    }
}

```

Main:

```

package Assignments.Week3.Assignment2;
import java.util.Scanner;
public class Main {
    public static void main(String[] args) {
        Scanner in=new Scanner(System.in);
        Animal[] an=new Animal[3];
        System.out.println("Enter name, gender and age of the bird:");
        an[0]=new Bird(in.nextLine(),in.nextLine(),in.nextInt());
        in.nextLine();
        System.out.println("Enter name, gender and age of the dog:");
        an[1]=new Dog(in.nextLine(),in.nextLine(),in.nextInt());
        in.nextLine();
        System.out.println("Enter name, gender and age of the cat:");
        an[2]=new Cat(in.nextLine(),in.nextLine(),in.nextInt());
        for(int i=0;i<3;i++){

```

```

        an[i].printing();
        an[i].eat();
        an[i].sleep();
        an[i].produceSound();
        System.out.println("\n");
    }
    int sum=0;
    int num=0;
    for(int i=0;i<3;i++){
        sum+=an[i].getAge();
        ++num;
    }
    System.out.println("The average age of animals is: "+(sum/num));
}
}

```

Result:

Enter name, gender and age of the bird:

chick

male

3

Enter name, gender and age of the dog:

hup

female

7

Enter name, gender and age of the cat:

murmur

female

5

Data about bird:

Name: chick

Age: 3

Gender: male

Bird chick ate some warms!

Bird chick is sleeping!

Chirp chirp ...

Data about dog:

Name: hup

Age: 7

Gender: female

Dog hup ate some meat!

Dog hup is sleeping! Hrrrh Frruuh...

Bark!

Data about cat:

Name: murmur

Age: 5

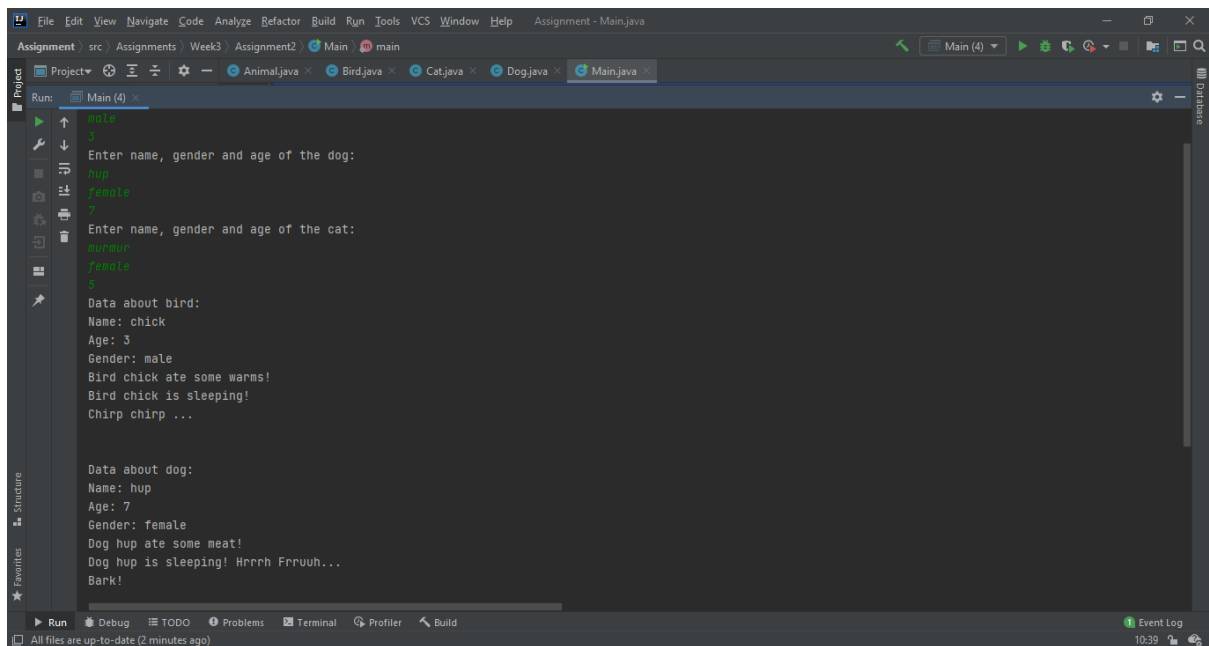

Gender: female

Cat murmur ate some fish!

Cat murmur is sleeping! Mrrr ...

Nyaa!

The average age of animals is: 5

A screenshot of an IDE window titled "Assignment - Main.java". The interface shows a project explorer on the left with a "Run" tab selected. The main editor area displays the following Java code:

```
1 public class Main {
2     public static void main(String[] args) {
3         // Enter name, gender and age of the dog:
4         Dog dog = new Dog("hup", "female", 7);
5         // Enter name, gender and age of the cat:
6         Cat cat = new Cat("murmur", "female", 5);
7         // Data about bird:
8         Bird bird = new Bird("chick", "male", 3);
9         // Data about dog:
10        Dog dog2 = new Dog("hup", "female", 7);
11        // Data about cat:
12        Cat cat2 = new Cat("murmur", "female", 5);
13        // The average age of animals is: 5
14        System.out.println("The average age of animals is: " + (dog.getAge() + cat.getAge() + bird.getAge()) / 3);
15    }
16}
```

The output console on the right shows the execution results:

```
Enter name, gender and age of the dog:
Dog
female
7
Enter name, gender and age of the cat:
Cat
female
5
Data about bird:
Name: chick
Age: 3
Gender: male
Bird chick ate some warms!
Bird chick is sleeping!
Chirp chirp ...

Data about dog:
Name: hup
Age: 7
Gender: female
Dog hup ate some meat!
Dog hup is sleeping! Hrrrh Frruuh...
Bark!
```

The bottom status bar indicates "All files are up-to-date (2 minutes ago)" and "Event Log 10:39".

Assignment3

Person:

```

package Assignments.Week3.Assignment3;
